

Ongoing Sessions (2+)

Pre-Session Protocol:

1. **Updated assessments** (PHQ, GAD & others optional) for progress tracking - saved in my resources)

EMDR Continuation from Previous Session:

Either continue Phase 1 or...

Phase 2: Positive Belief Installation (when reached):

AI Script: *"Look at the original image and put it together with the words [INSERT FIRST POSITIVE BELIEF from roadmap] and tell me how true this feels now – 1 is not true and 7 is completely true."*

Response processing:

- **1-6 rating:** Continue installation process
- **7 rating:** Move to next belief or Phase 3

Installation process for scores 1-6: AI Script: *"Put the words [INSERT FIRST POSITIVE BELIEF] together with your original image or what is left of it. Mash it together in your mind and start the bilateral stimulation."*

Post-bilateral stimulation check: AI Script: *"What do you notice now? Is it positive or negative?"*

- **Positive response:** *"If you again put the words [INSERT FIRST POSITIVE BELIEF] together with your original image or what is left of it. How true does that feel now? 1 is not true and 7 is true" (Under 6-7 say "Lovely! Keep going" → Continue Phase 2) (6-7 - move to the next Positive belief or if no more then move to phase 3)*
- **Negative response:** *"OK good, keep going"* → Return to Phase 1

Phase 2 completion: When VoC = 7/7, proceed to next positive belief or Phase 3

Phase 3: Body Scan Protocol

Initiation script: *"Now bring up the original image along with the positive belief [INSERT POSITIVE BELIEF]. Close your eyes and scan your body from the top of your head to the tips of your toes. Notice any tension, sensations, or discomfort."*

Process:

- Client reports physical sensations via a button

- **If sensations present:** Target with bilateral stimulation - “Focus completely on that sensation in your body and start your bilateral stimulation”
- Check if sensation is still present and keep going until it disappears. Then check for any more sensations.
- **If clear:** Session complete. Congratulations etc.

Completion: Return to calm space and session closure
